OUR CAPABILITIES AND COMMITMENT TO QUALITY

At Perth Hire Shop, we hire more than just quality equipment.

What we offer is tailored solution to your project requirements. 10 years in the industry and a team with 50+ years of combined experience providing excellent customer service, from equipment selection to delivery, through to technical support for the duration of the projects until completion.

Our Industry Coverage:

CONSTRUCTION
/ ENGINEERING

SMALL BUSINESS
/ TRADES & DIY

COMMERCIAL

MINING

INDUSTRIAL

INFRASTRUCTURE

ROAD / RAIL

Our field Hire representatives will provide advices and assistance for our hire services including maintenance on site or brake downs. We encourage our clients to discuss with their Hire representatives on the extend of the support availability, including tendering for each job and help identifying the right solutions for their project.

All equipment available for hire at our branch are compliant with state and national regulations, as well as thoroughly serviced, maintained and cleaned after every hire.

Our long term relationships with key manufacturers enable us to provide the latest makes and models of the equipment to our customers.

Some of the many brands of hire equipment we supply are Genie, JLG, Bomag, Yanmar, Toyota, Globe Power, Bartco, Zoomlion, Husqvarna, Makinex and many other industry leaders.

Perth Hire Shop capabilities and resources will help to optimise a return on investment and to increase productivity and minimise down time.

OUR SAFETY FOCUS AND APPROACH

Tutt Bryant Hire strongly believes that work related injuries, property and environmental damages can be preventable. It is in our best interest to ensure our employees' occupational health and safety. We are committed to create and maintain an Incident and Injury Free (IIF) workplace by integrating the Health, Safety and Environment (HSE) Management System approach, focusing on 'Leadership Accountability' and 'Management System Processes'.

The key elements of a successful HSE management system measures:

- ◆ Safety plan and inspection checklists - Emergency response plans, evacuation procedures and safety assembly points, project shutdown operations, rescue and medical duties.
- ◆ Assign HSE duties to branch managers and/or staff
- ◆ Risk assessments and monitoring - Eliminate potential hazards, outline areas that are not safety compliance
- ◆ Provide adequate ongoing training on rules and safety procedures of the workplace
- ◆ Set measurable targets and reviewed regularly by the HSE management team
- ◆ No hazardous activities will be undertaken prior to completing the risk and safety assessment checklists
- ◆ All operations are fully compliance with legal requirements
- ◆ Provide visitors with thorough information on the safety and risk preventative measures, as well as the emergency procedures
- ◆ All incidents are to be reported to the HSE management team
- ◆ All incidents are to be identified and investigated thoroughly by the HSE management team to prevent any future recurrence
- ◆ Provide Injury Management and Rehabilitation Program to staff as require
